## Customer Quote

"Last September Boott Hydro had a catastrophic event flooding the two horizontal generators to the centerline of the shafts. The generators were down for maintenance at the time. I received a call from the customer CRP to do a site visit. While at the site the customer asked to get a crew here ASAP to help pump out the generators and associated equipment. I made a call to Jay Porrazzo and Don Lacroix to get the site manned with millwrights and riggers ASAP. Like always they immediately responded...this job was like moving pyramids and Jay & Donny from APM stepped up to the plate. Thousands of hours with very motivated and professional crew. Great service and all it took was one phone call. Hats off to the entire APM team I would work anywhere on the planet with them supporting...THANKS AGAIN - Maurice (Bubba) Granville" - Integrated Power Services, Hydro Services North Region.
